PROJECTS

E-Bozorim

Live Link

Overview:
E-Bozorim is a modern online marketplace that allows users to buy and sell products easily. The platform includes a product catalog, user dashboards, payment system, and multilingual support, providing a seamless experience across devices.

My Contribution:
I actively participated in the **frontend development** of the project. My main responsibilities included:

- Implementing **edit** and **delete** functionality for products

- Developing **payment** and **product modals** inside the **dashboard**

- Working with **user roles** and dynamic **data tables**

- Integrating **interactive maps** and connecting them with the backend

- Managing **API integration** for product, user, and payment data

- Building and optimizing the **UI** for both desktop and **mobile** views

- Adding **multi-language (i18n)** support for global accessibility

Tech Stack:
Next.js • React • TypeScript • Tailwind CSS • REST API • Map • i18n

Result:
Delivered a fast, responsive, and multilingual marketplace with full CRUD operations, integrated payment workflow, and a user-friendly admin dashboard.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS,
